

# Science- Everyday Materials

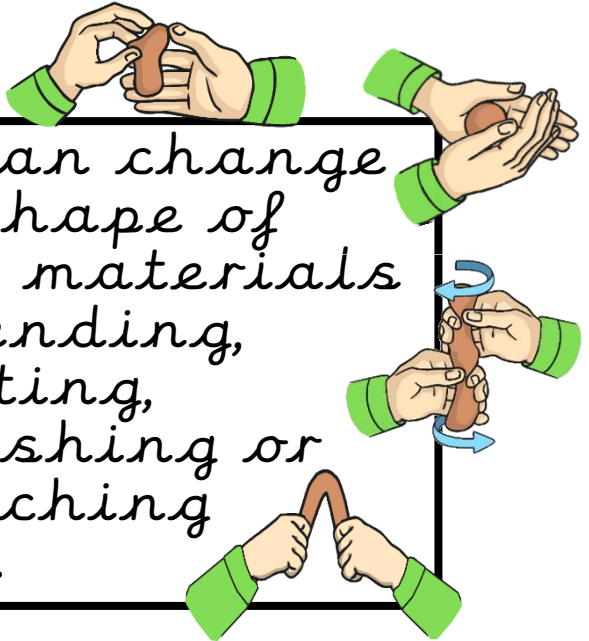

Objects are made from different materials including:

Materials are described by their properties.

You can change the shape of some materials by bending, twisting, squashing or stretching them.

Some materials can be recycled. This means they can be used again to make new things.

Recycling uses less raw materials and reduces landfill waste.

# Glossary

*waterproof- water can not get through*

*absorbent- a material that can soak up water*

*transparent- allows light to pass through it*

*opaque- does not allow light to pass through it*

*rough- uneven surface*

*smooth- flat, even surface*

*stiff- not easy to change shape or bend*

*bendy- can change shape easily*

*recycle- use materials again to make something new*
