

Endangered Species

Editing Task

all around our amazing planet, there are animals that need our help. These creatures are called endangered species, which means there are very few of them left. If we don't protect them, they could disappear forever — and that would be a terrible loss for everyone.

One well-known endangered animal is the giant panda. Pandas live in the misty mountains of China and spend most of their day munching on bamboo. Because forests have been cut down, pandas have lost much of their habitat. Luckily, people have worked hard to plant new bamboo forests and create safe areas called reserves, and now panda numbers are slowly rising.

Another animal in danger is the sea turtle. These gentle swimmers face many problems: plastic pollution, fishing nets and disappearing beaches where they lay their eggs. Conservation groups are helping by cleaning beaches, protecting nests, and teaching people how to keep the oceans safe.

The black rhino is also critically endangered. Rhinos are powerful and impressive, but they're hunted for their horns. Rangers and wildlife organisations now patrol parks, use tracking technology, and work with local communities to keep rhinos safe.

Every small action matters. When we work together — bravely, kindly and thoughtfully — we can protect the wonderful wildlife that makes our world so special.

What can you do to help protect the endangered species of our planet?

Editing Task

1. Circle 12 missing capital letters in blue.
2. Mark 5 missing full stops in red.
3. Underline 12 spelling mistakes in green.
4. Mark one missing question mark in yellow.
